

FRIDAY 9 JULY, 6:30 – 8:30 PM

Tips and Tricks to Know about Navigation

COVID permitting, our own YachtMaster and Instructor since 1986, Clive Jones (Jonesci version) will share with us from a basic level to a little more advanced knowledge on modern navigation without a chart plotter. Yes, we still need to know how to do it when the electrics fail us!

We will look at working out a simple passage plan and understanding what is needed to be able to get there safely. How do you plot a safe course, how to check where you actually are, when will we arrive, what is the tide doing or going to do? Lights and buoyage and some ColRegs will be included and of course what are all those “things” on the charts. This will be essentially theory based in a presentation rather than hands on due to the time limit - but if there is enough interest for a more in-depth course with your own charts, we will look at that.

Please let us know if you are coming.

RSVP – Clive on clivejones721@gmail.com

Learn the basics of modern navigation – for when our electronics fail!

Important information for anyone looking to cruise outside the Bay

Numbers limited to 30 so please RSVP

Bar & club open from 6pm. Bar open before and after session and during break.

\$10 on the door – cash or card
